

## Hand Held Portable Wind & Weather Meters

We offer multiple hand held wind and weather meters. There are 7 meters to choose from, each meter has different measuring capabilities. The jackknife case allows more precise wind speed readings because the users hand is distant from the wind impeller, which then measures undisturbed air flow. All wind meters are designed with a wind speed accuracy of better than +/- 3%, they are water resistant, float and have a 2-Year warranty.

More information available online at <http://www.inmtn.com>

### Models & Measurement Options:

WM-100 WindMate Wind Speed

SM-18 Skymate Wind Meter with Temp & Wind Chill

WM-200 WindMate with Wind Speed & Direction

SM-19 Skymate Plus with Humidity, Dew Point & Temperature

WM-300 WindMate with Wind Direction & Humidity (agriculture, forestry & emergency)

SM-28 Skymaster Wind/Weather Meter

Wind Speed	Wind Chill
Temperature	Dew Point
Relative Humidity	Altitude
Barometric Pressure	Heat Index

WM-350 WindMate Multi-function Weather Meter

Wind Speed	Wind Direction
Temperature	Digital Compass
Relative Humidity	Barometric Pressure
Wind Chill	Wet Bulb
Dew Point	Delta T
Comfort Index	Altitude
Density Altitude	Other Calculations ..
